Automotion, Inc. Names Bill Wold as Director - Business Development

Oak Lawn, IL Bill Wold has been named Director - Business Development for Automotion, Inc. a well known designer and manufacturer of innovative conveyor systems for the distribution/logistics market areas.

Bill joined Automotion in 1998 bringing 32 years experience of conceptual design and sales of integrated package conveyor and sortation systems. He is a seasoned professional and has experience with multi-million dollar material handling systems both domestic and abroad.

In his new role, Bill will be drawing on his base of experience to develop sales strategies that will guide Automotion's system sales/engineering teams in their successful pursuit

of systems contracts. His comprehensive understanding of the industry, along with his innovative ideas, will help us continue our momentum in the distribution/logistics markets.

His ability to help clients find solutions, coupled with his years of experience interfacing with key accounts and material handling consultants, has helped position Automotion for the dynamic growth enjoyed over the last several years.

Bill and his wife Kay live in McCormick, South Carolina. They have three grown children and five grandchildren.

Automotion, Inc. headquartered in Oak Lawn, Illinois is a technology based designer and manufacturer of integrated package conveyor and sortation systems. We design and implement Material Handling Systems for Distribution Centers, Warehousing Facilities and Manufacturing Plants.
