Automotion, Inc. Announces New Systems Division; Names Mike Kasperski as President

Oak Lawn, IL manufacturing division is able to focus on the production tasks at hand and the further development of their Distribution Network," he concluded.

Mike Kasperski has been named President of the new Automotion Systems Group, Formerly serving as Automotion's Vice President of Sales & Marketing,

a Division of Automotion, Inc., a well known designer and manufacturer of innovative package conveyor and sortation systems. *Mike is obviously well versed in system integration. Mike has been in the material handling industry for over twenty years. He came to Automotion in 1993 and his contributions have been immediate and long lasting.*

The new division, ASG (Automotion Systems Group) was formed to better serve the total needs of Automotion's direct sales customers.

"Separating the System Division from the manufacturing operations at Automotion allows us to focus our efforts on more than just our customers conveyor needs. Every solution cannot be met by conveyor alone. We're here to provide whatever equipment is needed to do the job right" stated Kasperski. "Likewise, the

His step by step career path from engineering to project management to direct sales has given Mike a strenght in solving customer challenges . He understands the customers needs from planning thru implementation. We wish him well in his new endeavor as president of the newly formed Automotion Systems Group.

Automotion, Inc. headquartered in Oak Lawn, Illinois is a technology based designer and manufacturer of integrated package conveyor and sortation systems. We design and implement Material Handling Systems for Distribution Centers, Warehousing Facilities and Manufacturing Plants.
